

Julio

Full Stack Developer & Python & React & Web Data Scraping

100 BEACH ROAD, 01-25 SHAW TOWERS

dydadenys9@gmail.com

Education

Master of Science (MS) in Computer science

AGH University of Science and Technology | April 2021 - April 2023

Bachelor of Science (BS) in Telecommunications engineering

Akademia Górniczo-Hutnicza | April 2019 - April 2021

Key Skills

- Full-Stack Development, Web Development
- Front-End Development, Back-End Development, Database Development
- API Development, API Integration
- Python, Pandas
- React, Next.js, JavaScript, WordPress, Vue, Angular
- Web Scraping, Data Scraping, Web Scraping Software
- Bot Development

I'm a seasoned Full-Stack Developer with over 7 years of experience in crafting robust web applications, advanced automation solutions, and large-scale web scraping combined with powerful data analysis. I thrive on transforming complex challenges into efficient, scalable solutions tailored to your business needs.

Professional Experience

Senior Full Stack Developer

Outliant, Texas, United States | September 2024 - February 2025

- Led a team of developers in the design, development, and implementation of complex web applications utilizing a mix of front-end and back-end technologies.
- Utilized Agile methodologies to efficiently manage project timelines, ensuring on-time delivery of high-quality software products.
- Developed and optimized database structures and queries to improve application performance and scalability.
- Collaborated with cross-functional teams to gather and analyze requirements, propose solutions, and implement new features and enhancements.

Senior Software Engineer - Python developer

Mindbridge, Tauranga, New Zealand | February 2024 - August 2024

- Led a team of developers in the design and implementation of scalable and efficient Python-based solutions for a high-traffic e-commerce platform
- Developed and maintained complex backend systems and APIs using Python, leading to a significant increase in system performance and reliability
- Collaborated with cross-functional teams to troubleshoot and resolve technical issues, resulting in a 20% decrease in system downtime
- Implemented best practices for code quality and development processes, increasing team productivity by 30%

Intern Scraping Engineer

EPAM Systems, Pennsylvania, United States | January 2023 - January 2024

- Assisted in developing web scraping tools using Python and BeautifulSoup to gather data from various websites for analysis and research purposes
- Conducted quality assurance testing on scraped data to ensure accuracy and consistency in extraction process
- Collaborated with senior engineering team to optimize and improve existing scraping algorithms for better efficiency and performance
- Engaged in regular code reviews and troubleshooting sessions to identify and resolve issues in scraping scripts and pipelines
